## Sustainability Weforest

Rootz would like to contribute to a healthier climate, a greener planet and restoring our planet's natural resources. Rootz has a partnership with WeForest. With the purchase of every 3 Rootz products we will plant one tree in cooperation with weforest.org.

### *Why planting trees:*

Trees will suck carbon dioxide from the atmosphere and reverse global warming:

- Forests balance the Earth's water-cycle essential for cooling our climate
- Forests stabilise the climate by sucking carbon dioxide (CO2) out of the atmosphere and fix it into soils and biomass.
- 50% of a tree's biomass is carbon which remains stored, acting as a 'carbon sink', unless the tree decays or is burned.
- Global forests are estimated to hold more CO2 than the atmosphere.
