Contains: Organic Ethanol, Organic Lavender Extract, Organic Green Tea Extract, Organic Passion Flower Extract, Organic Chamomile Essential Oil, Stevia Extract, Oleic Acid, Melatonin, Ionic Magnesium

Benefits: Pain Relief, Relaxation/Calm, Sleep, Daily Wellness, Mood

MSRP: \$79.99

WHAT ARE CUSTOMERS SAYING?

Be Active CBD inhaler – fantastic! ★★★★★

This is exactly what I was looking for. Easy to carry, use and feel the effects quickly. Oil droppers had not worked for me, and this is great.

Sabrina W.

Verified Buyer – BE ACTIVE

Miraculous Inhaler! ★★★★★

This spray definitely helped me breath better. It relaxed my lungs all day. No wheezing no coughing, just better breathing.

Rolando M.

Verified Buyer – BE CALM

Amazing! ★★★★★

The flavor is amazing and not overpowering! This has helped me sleep and also helped with stress especially during the week of my wedding!!! Will buy again!!!

Mindy M.

Verified Buyer – BE WELL

Easiest way to take CBD ★★★★★

I love how easy and convenient this inhaler is. I take 2 puffs every morning and have already noticed less stress and just a better state of mind overall. I highly recommend.

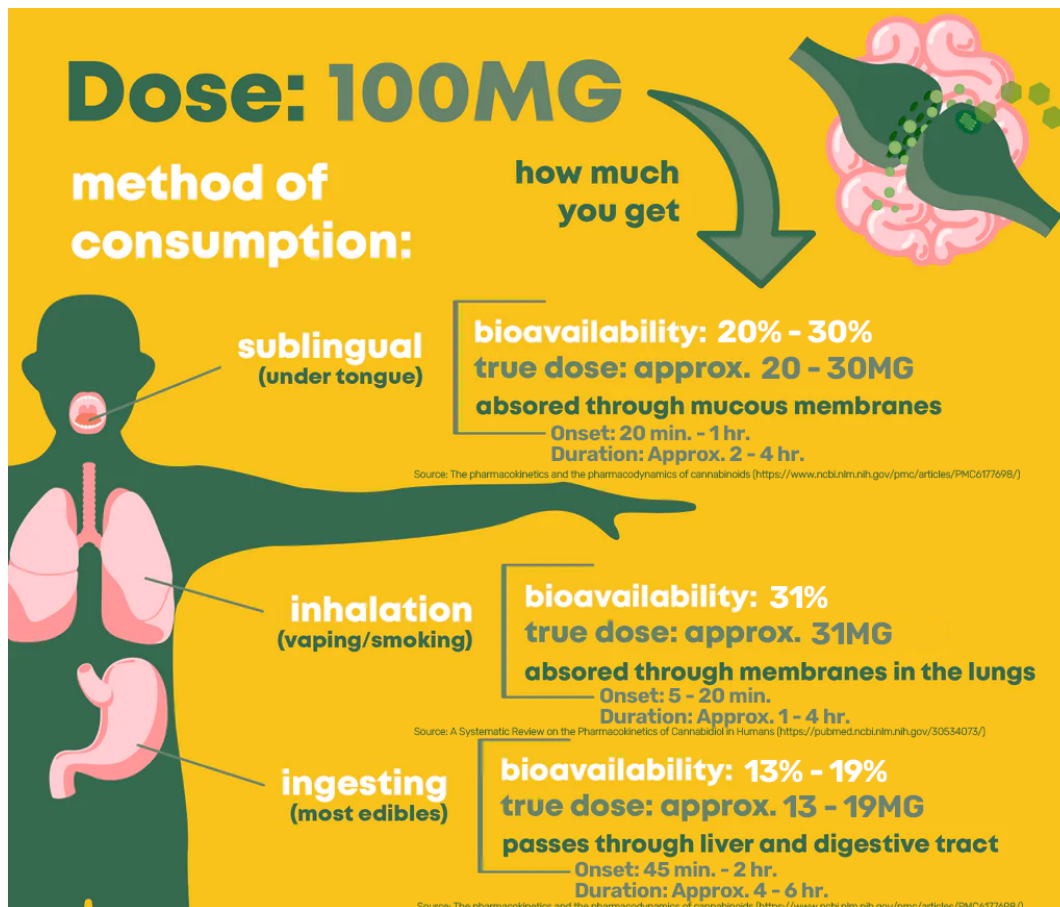

Ashley J.

CBD Delivery Methods: Bioavailability, Onset and Duration of Effects

There are many different ways to consume CBD. Each of these methods has a different impact on how much, and how quickly, the CBD gets absorbed into your bloodstream. This phenomenon is called bioavailability. It's important to understand this because it will help you determine how much you'll need to take to feel its effects; and you can also get an idea of how long it will take for your CBD to work.

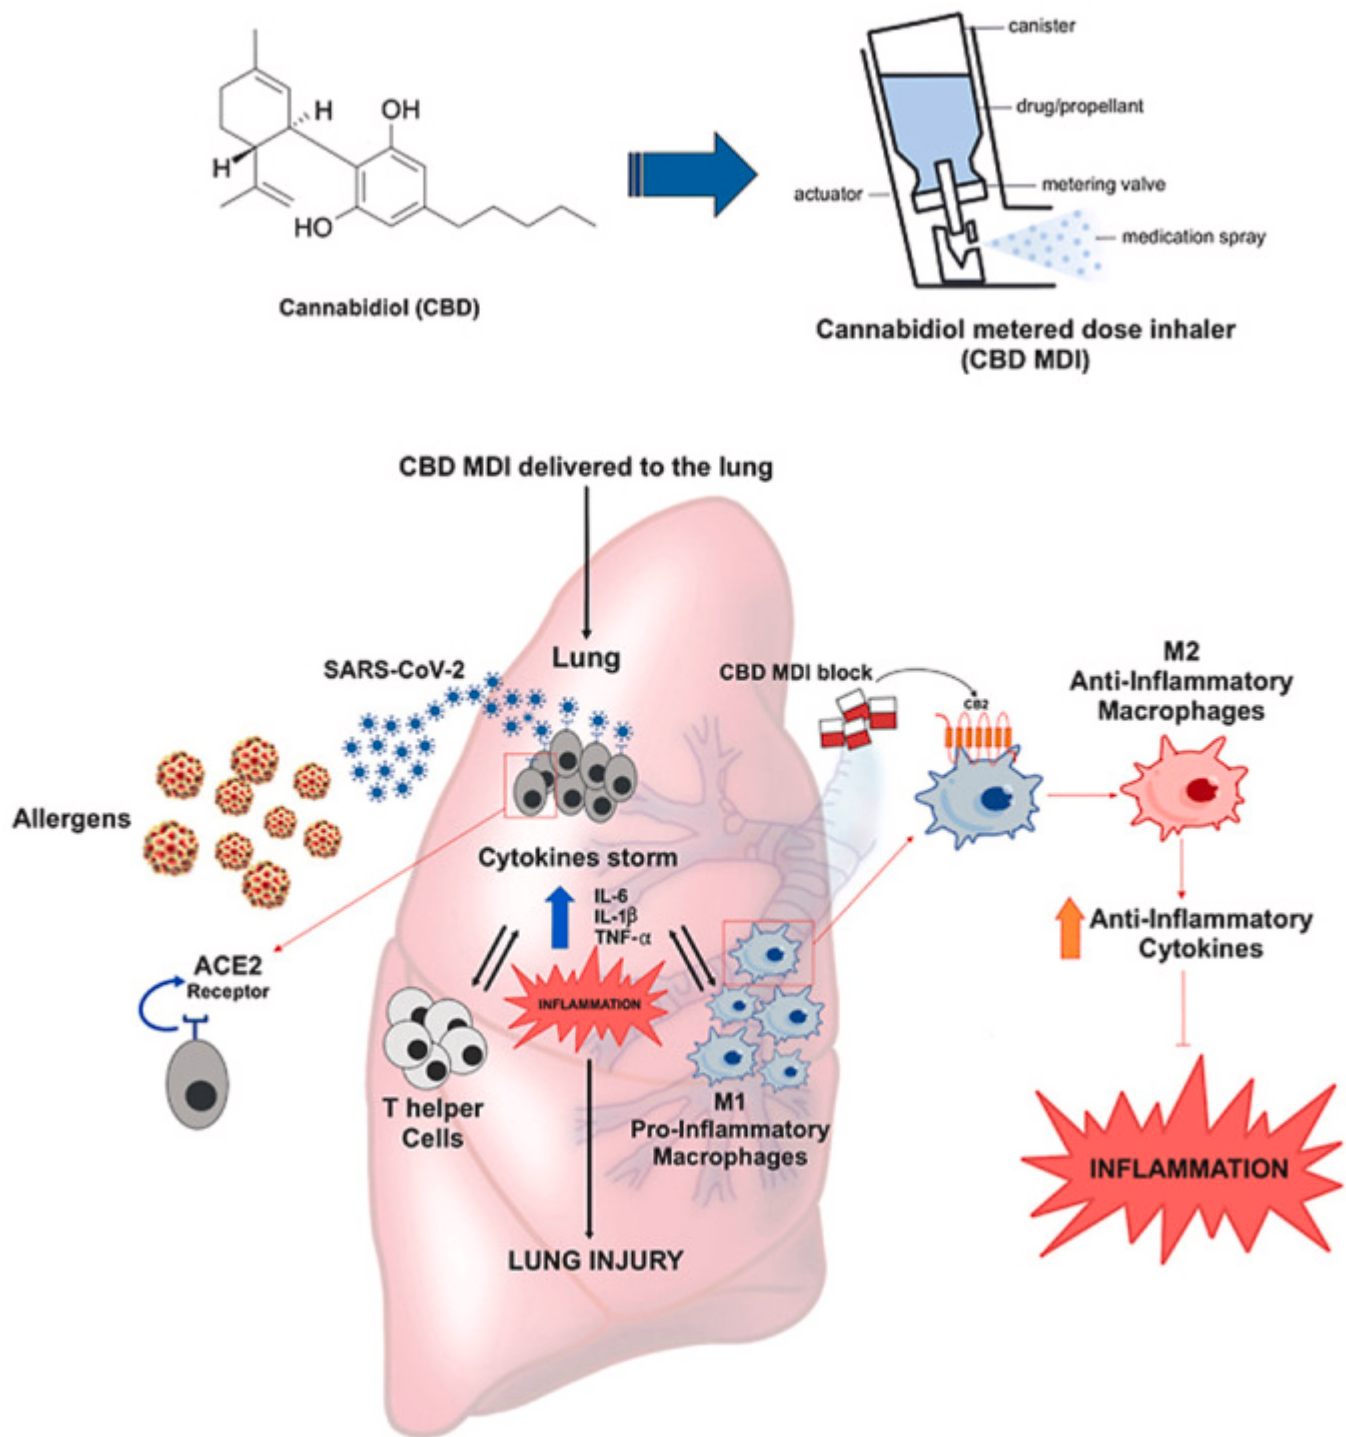

CBD Metered Dose Inhaler Bioavailability = 65%+

Compared to CBD inhalation through vaping and smoking, the metered-dose inhaler has demonstrated bioavailability of more than 65%, 2x as effective as smoking and vaping! Onset is nearly instantaneous and the duration is similar to vaping and smoking.

Source: Cannabidiol Use in Older Adults: US Pharm. 2020;45(3):34-38

Benefits:

- Accurate and consistent metered spraying
- Convenient and discrete usage
- Optimum active bioavailability and uptake
- Quicker effective release/onset and maximum absorption
- Lower cost per use and cost per milligram CBD

If you want an idea of what CBD inhalers can really do, just read this study about treating inflammation from Covid!

Oral inhalation of cannabidiol delivered from a metered dose inhaler to alleviate cytokine production induced by SARS-CoV-2 and pollutants

The most cost-effective, measurable, and efficacious delivery system available

- Each inhaler contains 1100mg of micellized full-spectrum hemp oil (non-detectable THC)
- There are 200 doses or sprays in each inhaler, so each spray provides the equivalent of 5.5mg of active CBD.
- Inhalers with micellized CBD deliver almost 65% bioavailability. Compare that to traditional tinctures with 13% -19% bioavailability (at nearly the same price).
- Assuming it takes 3 sprays to receive the required results then the required results can be achieved 66 times.
- At a price of \$79.99 per inhaler the price to receive the required results is \$1.21 per required results and repeated as required over the day.

About Our CBD Inhalers

- Our Micell CBD is 1100mg of Full Spectrum Hemp oil that has undergone the Micellization process (Purzorb™).
- Micellization process sonically shatters the full spectrum oil into 22nm (nano) size particulates and then reverses the polarity of the cells to draw water into them making it truly water soluble, not water “miscible”.
- Like all Albuterol inhalers, there is a small amount of Ethanol in the formula which cleans the Alveoli heads allowing for maximum absorption.
- The Nebulization of the formula allows for greater absorption at the Alveoli head.
- Micell CBD is 5x as Bioavailable as a tincture with a 65+% absorption rate – there is no loss in the liver or kidneys.
- Absorption into the bloodstream is nearly instantaneous.
- There are 5.5mg of Micell CBD FSHO in each actuation – 200 actuations per Inhaler.

How to Use Inhaler

Suggested Use of the Metered Dose Inhaler (MDI):

1. Shake inhaler well 3 – 4 times.
2. Remove the cap from MDI and shake well.
3. Breathe out all the way.
4. Place the mouthpiece of the inhaler between your teeth and seal your lips tightly around it.
5. As you start to breathe in slowly, press down on the canister one time.
6. Keep breathing in slowly and deeply as you can.
(It should take about 3 seconds for you to completely breathe in.)
7. Hold your breath for 3 seconds to allow dispensed flow to reach the airways of the lungs.
8. Exhale at your comfort level.
9. Repeat as necessary (3 – 5 puffs, 3-12 times daily or as needed).
Shake inhaler between each puff.
10. Allow 30 days of consistent use for optimal results and benefits.

Clean inhaler with warm water or isopropyl alcohol and cotton swab. Store inhaler in 60 – 70° F (16 – 25° C) place.

Research & Scientific Studies

Bio Botanical Study

Our medicines are extracted from naturally grown cannabis plants that do not cause any significant environmental effects.
