

Motivated Design Pop-Up & Swivel Specifications

Motivated Design's Pop-up & Swivel Lifts are a uniquely adaptable design. This time tested and proven concept has been a major "Go To" product for our customers for more than 18 years. This TV lift system is suitable for all environments and is rugged enough for extreme duty in Marine applications while remaining Rock Steady and unbreakable.

The chart below shows the new lineup for 2020 as we have adjusted the sizes to better fit today's TVs with even more compactness. The chart indicates clearly what size lift will work best with your application based on your TV's dimensions.

Please note that you can mix and match any TV platform with your choice of Rails in order to increase or decrease travel when available to allow for added Speaker Bars, or to reduce cabinet height if your TV height will allow it. Also note that our Pop-Swivel Lifts can be used for more lifting applications than for just lifting TVs. Our versatility continues as we can install motors with capacities from 75 lbs to over 350 lbs plus. Lastly, we can custom build any size lift for whatever application or to fit exactly into an existing cabinet or space. This same lift system can also be ordered for Inverted applications for lowering TVs out of ceilings.

Manual Swivel is Standard Effective 01/01/2025

Model	TV Size	Dim "A"	Dim "B"	Dim "C"	Dim "D"	Dim "E"	In Stock
PS26 - R25	24"-26"	30"	25"	4" or 6"	21"	4"	No
